ABOUT MY INDIFUELS

We are pioneers in biofuels, Renewable Fuels, and Synthetic fuel production in India. Since the Invention of fuels, no up-gradation has been done in the production and quality of fuels. We, with our research and development team, are continuously working to provide the best and most advanced quality fuels to our customers. We are constantly creating renewable fuels solutions and green energy innovations to create a happier, cleaner, brighter India; Our company is dedicated to the mission of Sustainable development to deliver a powerful green fuel experience across the country.

My IndiFuels is one of the world's advanced fuels and a true alternative to diesel, and petrol, My IndiFuels offer an ultra-premium, low emission fuel that is compatible with all fuel engines, My IndiFuels is recognized as a drop-in fuel, as per National policy of Bio Fuels Manufactured, processed and tested.

My IndiFuel Services is active as a Biodiesel/Petrol Distributor in India. We believe in delivering quality products. We invest heavily in Biofuel Research & Development. Recognizing the need for biofuel, we started operations in Biofuel Industry. Our Team offers technical consultancy to major groups in Biofuel Industry.

My IndiFuels is the cleanest fuel introduced in Indian Market. My IndiFuels offers a superior quality of Biofuel, engineered to maximize diesel engine performance. It conforms to petroleum diesel specifications for use with existing infrastructure, distribution systems and engines.

MY INDIFUELS RETAIL OUTLET'S

06

Loan Facilities up to 50% also available from company end depending upon profile.

MY INDIFUELS CBG PUMP

At MyIndifuels, we are proud to introduce Bio-CNG petrol pumps, a significant step towards making India Aatmnirbhar by reducing dependence on imported crude oil. Our Bio-CNG is produced from Municipal Solid Waste (MSW), organic waste, and agricultural waste, turning these resources into clean and sustainable energy. By promoting the use of domestically produced biofuels, we are not only driving India's energy independence but also contributing to environmental sustainability. This initiative supports the circular economy, enhances farmer income, and paves the way for a greener, more self-reliant India.

Key Takeaways of this Proposal

01

Starts from 1.40 cr and goes upto 1.80 Cr onwards. Tailor your investment to your financial goals with our customizable plans, offering flexible investments.

02

To be sold Market prices.

03

MY INDIFUELS RETAIL OUTLET'S ROI

KRISHI PUMP

- Daily Diesel Sales: 2,000 litres @ ₹5/litre = ₹10,000
- Daily Petrol Sales: 2,000 litres @ ₹7/litre = ₹14,000
- Total Daily Profit: ₹18,000

Total Monthly Profit: ₹24,000 × 30 = ₹ 720,000

DIESEL-PETROL PUMP (MINI)

- Daily Diesel Sales: 2,000 litres @ ₹6/litre = ₹12,000
- Daily Petrol Sales: 2,000 litres @ ₹8/litre = ₹16,000
- Total Daily Profit: ₹28,000

Total Monthly Profit: ₹28,000 × 30 = ₹840,000

CBG PUMP

- Daily CBG Sales: 2,500 kg @ ₹6/kg = ₹15,000
- Total Monthly Profit: ₹450,000

Total Monthly Profit for CBG Pump: ₹450,000

DIESEL-PETROL-CBG PUMP (MEGA)

- Daily Diesel Sales: 3,000 litres @ ₹6/litre = ₹18,000
- Daily Petrol Sales: 2,500 litres @ ₹8/litre = ₹20,000
- Daily CBG Sales: 2,000 kg @ ₹6/kg = ₹12,000
- Total Daily Profit: ₹50,000

Total Monthly Profit: ₹50,000 × 30 = ₹1,500,000

DIESEL-PETROL PUMP WITH DEPOT

- Daily Diesel Sales (Pump): 3,000 litres @ ₹6/litre = ₹18,000
- Daily Petrol Sales (Pump): 2,500 litres @ ₹8/litre = ₹20,400
- Daily Depot Diesel Supply: 3,000 litres @ ₹2/litre = ₹6,000
- Total Daily Profit: ₹32,400

Total Monthly Profit: ₹44,000 × 30 = ₹1,320,000

COMPARISON BETWEEN MIPL and OMC's

| S.No | PARTICULARS | OMC | MIPL |
|------|------------------------|--|---|
| 1. | Licensing & Permission | Adherence of stringent government regulations | Less red-tapeism involved as setting up & operating is under the supervision of MIPL |
| 2. | Price Control | Price is regulated by the Govt restricting to lesser profit as Rs 1.8 to Rs 2.4/litre on Diesel & Rs2.0 to Rs3.4/litre on Petrol | Price is regulated by MIPL with higher profit margins as Rs 8/litre on Petrol and Rs 6/litre on Diesel. |
| 3. | Niche Customers | Conventional fuels like Petrol and Diesel have consistent demand despite the growing push for greener alternatives | Targeting consumers and businesses committed to reducing their carbon footprint by offering fuel at ₹2 less per litre than the market price |
| 4. | Investment | Setting up OMC pump involves capital investment in infrastructure , land and compliance as 4-4.5 Cr | Becoming an authorised dealer franchisee cost between 45-lakh to 1 Cr. |

COMPARISON BETWEEN MIPL and OMC's

| | | | |
|----|-----------------------------|---|---|
| 5. | Operational Cost | Operational cost includes regular inspection, high safety standards and compliance with government regulations. | Lower Operational Cost due to less regulation and simpler infrastructure. |
| 6. | Carbon Footprint | Significant carbon Foot Print contributing to air pollution and climatic changes. | It's a renewable energy source that reduces Green house gas emission compared to conventional Diesel, Petrol and Cng. |
| 7. | Market Presence & Emergence | Well established Brand recognition and customer trust | Growing market with Govt push towards sustainable energy. |

NOTE

"The Dealer shall be responsible for executing all construction and civil works, including obtaining necessary No Objection Certificates (NOCs). The Company will provide guidance and support to facilitate the completion of these tasks."
